

PRESS RELEASE

Are you paying too much for ABI analyser accessories?

At Gel Company we have been supplying accessories for ABI analysers for a number of years at much lower costs than you can buy elsewhere. The next time you are buying accessories why not give Gel Company a try?

Gel Company offer accessories for the 3730, 3730XL, 3500, 3500XL, 3130XL, 3100-AVANT, 3131 and the 310 genetic analysers.

We also offer a capillary array regeneration service so that you can increase the numbers of usages from your capillary arrays. If you are using ABI3730/3730XL, ABI3500/3500XL or ABI3100/3130XL then simply send us your expired array and we will regenerate it back to its full use for just a fraction of the cost of a brand new capillary array. This service comes with the same warranty as a brand new array. Arrays can be regenerated multiple times. You will receive the same regenerated array back where it will be clean and dry and suitable for storage ready for use.

Check our website [www.gelcompany.com] or catalogue for the full range of accessories suitable for ABI analysers. There you will also find instructions for the return of arrays for regeneration. It should be noted that the accessories we supply are not original manufacturer spare parts. However, all spares have a warranty and will save you considerable cost on your spares and consumables budget.

Gel Company has been in business since 1995 supplying low cost tools and consumables for the life science research community. Our products are used in many leading genomics, proteomics and cell culture laboratories around the world. We have distribution points in the USA and the UK.
