

ARE YOU PAYING TOO MUCH FOR ABI GENETIC ANALYZER ACCESSORIES?

INCREASE THE NUMBER OF USAGES FROM YOUR CAPILLARY ARRAY

Regenerate your used array for a fraction of the cost of a new one. Compatible with all array types.

Detection plates. Optically clear for real time PCR. Barcoding available. 96 and 384 well formats.

Recycle. Reuse. Regenerate

Send us your expired array **ABI3730XL** and/or **ABI3100/3130** – and we will regenerate it back to its full use for just a fraction of the cost of a brand new capillary array. Comes with the same warranty as a brand new array. Arrays can be regenerated multiple times. For best results, send us your array as soon as it comes off the sequencer or store the arrays wet before shipping.

- Send and receive the same array, regenerated
- Arrays come back clean and dry
- Can be stored until ready to use

Detection Plate

96 well semi-skirted

- Directly compatible with all major thermal cyclers including all ABI instruments
- Can be used directly in ABI 96-well sequencers with no adapters necessary
- Cut-away corner for precise orientation
- Raised skirt
- Available in opaque black and white for fluorescent and luminescent based procedures

A BETTER WAY TO EXCISE BANDS FROM GELS

GeneCatcher

Disposable gel excision tips

- Designed for removing bands from agarose gels
- One handed operation
- Push button gel release
- Push button tip release
- Avoid cross contamination
- Tips fit standard 1000 μ l pipettors

GeneCatcher Tips

CAT# PKB4.0
