SIMPLE & RAPID GEL DNA RECOVERY

CleanSpin Gel DNA Recovery Kit

The CleanSpin Gel DNA Recovery Kit provides a simple, rapid method for the purification and concentration of high quality DNA from agarose gel slices.

- quick (15 mins) recovery of ultra-pure DNA from TAE or TBE-buffered gels
- column and filtration plate design allows DNA to be eluted at high concentrations into minimal volumes of water or TE buffer with no wash residue carryover
- omits the use of glass beads, organic denaturants and proteinases
- eluted DNA is well suited for use in DNA ligations, sequencing, labeling reactions, PCR, etc.
